Artist Statement

Denise Keegan

Photo by James Damion
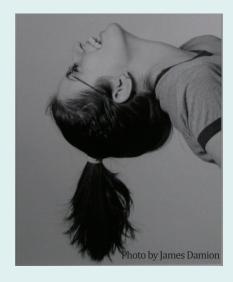

Photography is hitting the pause button on life. It's freezing a moment in time forever. It's capturing history, heartache, and happiness.

I began taking pictures when I was 12. I bought my first camera - a 35mm aqua green Vivitar - with birthday money. I gravitated towards taking photos in macro and "blurring the colors" to make an abstract of the image.

Now, I not only continue with macro, I capture images of scenery, animals, structures, and home interiors.

My work has been featured in newspapers, local magazines, and books.

And as long as I have a camera, I will continue to keep hitting the pause button!
Life is amazing and it needs to be captured.
